ASK ANDREW (and ZOHRAN) #14

Which NYC mayoral candidate has the worse record on public safety?

BROOKLYN, NY... The Cuomo COVID Orphans released the latest yet to be answered questions for reporters to ask former Governor Andrew Cuomo in this 14th installment of their weekly series, called ASK ANDREW.

NYC mayoral candidate Andrew Cuomo told [Politico on July 29th](#) about his rival, Assemblyman Zohran Mamdani, "His positions when it comes to public safety are abhorrent and wholly disconnected from any responsible government approach."

Talk about the pot calling the kettle black! Remember the 15,000 dead nursing homes residents under your leadership?

The Cuomo administration's approach to Nursing Homes being the first and only option for 9000 hospital discharged COVID positive patients was wholly disconnected from any responsible government approach and not based on science or even the CDC federal guidelines (see [Ask Andrew #1](#)).

Andrew Cuomo's [March 25th Directive](#) forced Nursing Homes to accept 9,000 COVID positive patients without requiring testing. This is during the time when every 5 year old child knew not to get close to grandma for fear of giving her COVID. We, the nursing home orphans, gladly stayed out of nursing homes as required on [March 13](#) to help protect those we love. Yet , twelve days later Andrew's March 25th directive sent over 9,000 COVID positive patients into those very same nursing homes we sacrificed to protect.

This week's ASK ANDREW (& ZOHRAN)

1. Ask Zoran: Would you have sent COVID patients to nursing homes as a matter of public safety and responsible government approach?
2. Ask Andrew: Was your administration's approach to make Nursing Homes the first and only option for discharged hospital COVID positive patients: A) A responsible government approach? B) Following the science when the federal guidelines suggested 14 day quarantine?
3. Andrew: What science was used when denying COVID testing before admittance?
